

The **Brevetti Prisma CE** manual double mitre saw features a horizontal blade movement allowing a maximum cut width of 125mm. The Prisma CE's manual action is ideal for a custom framer as it allows you full control during the cutting process. This in turn lets you get a real "feel" for the timber and the cut, allowing you to make any adjustments necessary. The Brevetti Prisma CE also now comes standard with our exclusive Leuco G5 high quality blades.

## Brevetti Prisma CE Manual Double Mitre Saw
