

CANVAS STRETCH MASTER PLUS

The Stretch Master Plus is our solution for production houses who want the speed of a fully automatic machine without the reliability issues of one. For a fraction of the cost of a fully automatic machine, you can expect speeds of up to 80 units per hour. It boasts the reliability of our Canvas Stretch Master Production range, along with a host of extras such as stretching and stapling both sides at once, pneumatic braking, pneumatic frame stop, corner folding and more!

Here are the key features:

- Assisted corner folding
- Stretch and staple 2 sides at once.
- Standard models available are 1m x 1m (39" x 39"), 1.2m x 1.2m (48" x 48") and 1.6m x 1.6m (64" x 64")
- Stretches from 10" up to 64".
- Frame sizes from 12mm (1/2") up to 75mm (3") can be used with the machine
- Stretches a canvas in well under 1 minute
- Adjustments on the machine means it can stretch paper, linen and a variety of other materials
- Facilitates gallery wrap and a guide both sides ensures even stapling.
- The stretching mechanism is pneumatic and has control points so tension can be adjusted to suit
- Only the highest quality parts are used and spare parts are rarely needed.
- Pitched table makes a small footprint

Technical:

- Size: 780 mm wide x 2250 long x 1760 mm high (26" wide x 88" long x 70" high)
- Weight: 1m x 1m - 230 kg 1.2m x 1.2m - 260 kg 1.6m x 1.6m - 300 kg
